1. APPLY CALIBRA® TRY-IN PASTE
Gently seat onto preparation. Clean excess with a cotton pellet and/or blunt explorer. Try-In Paste is a guide for cement shade range selection only.

2. CLEAN AND DRY
Once fit and esthetics are verified, thoroughly clean all intaglio surfaces of the veneer with water spray and dry.

3. APPLY SILANE AGENT
Apply Calibra® Silane to the veneer as outlined in the manufacturer’s Direction for Use. Air dry the silanated surface of the restoration with clean, dry air from a dental syringe or allow to air dry.

4. APPLY ADHESIVE TO VENEER
Apply a single coat of Prime&Bond® XP Adhesive to the intaglio surface of the veneer. Air dry for 5 seconds.

5. AIR DRY
Air dry for 5 seconds.

6. APPLY TOOTH CONDITIONER GEL
Apply tooth conditioner gel to available enamel (and dentin) for 15 seconds. Rinse for 10 seconds. Blot dry to keep moist. Do not rub.

7. APPLY ADHESIVE TO TOOTH
Apply Prime&Bond XP Adhesive and leave it undisturbed for 20 seconds. Avoid pooling.

8. AIR DRY
Gently air dry for 5 seconds.
1. Or follow manufacturer’s Directions for Use.
2. USA and Canada: Caulk® 34% Tooth Conditioner Gel; Europe: DeTrey Conditioner 36%
